Course Overview

A two-day, hands-on WSQ course in system integration for digital marketing with Claude Cowork and Claude Code. Learners take one business — Horizon Wealth Planning, an independent financial-planning firm in Singapore with a website and no marketing team — and build it an AI marketing team: a Marketing Team Lead and five specialists (Growth Strategist, Content Creator, Creative Designer, Website Designer, Growth Analyst), each with instructions, skills and connectors. They assess the compatibility of every component and interface and integrate them (Topic 1); test each integration through real campaign work and troubleshoot the errors (Topic 2); and version the team, propose changes and apply integration best practices (Topic 3), with a person approving every external piece. The course uses Claude Code subagents and agent teams, Claude connectors (MCP) and scheduled tasks, and publishes pages as Claude artifacts.

Course code TGS-2023018659 · 2 days · 16 hours: 13.5 hours of training and a 2.5-hour assessment · 186-slide deck v10.0 · 15 labs, each in its own folder. TSC: System Integration (ICT-DIT-3016-1.1).

Learning Outcomes

By the end of this course, participants will be able to:

- **LO1.** Conduct a compatibility assessment of Claude Cowork interfaces and use essential tools to integrate selected marketing components.
- **LO2.** Test the integrated marketing components and interfaces, identify integration errors and conduct basic troubleshooting.
- **LO3.** Propose changes to the integration plan from observed results, through versioning, and apply integration best practices.
