Lab 06 — Growth Analyst: Personas from Evidence

Claude Cowork for Digital Marketing · Day 1 · Use Claude Code

> **USE: CLAUDE CODE** — Code mode (the </> button) in the Claude desktop app, in your horizon-studio folder

Course: Claude Cowork for Digital Marketing (TGS-2023018659)

Day 1 · Topic 2 · about 40 minutes · slides 85–90

Surface: Claude Code (three analyst subagents in parallel)

Features: three analyst sub-agents, one per data file · counts, not impressions · confidence labels · content requirements

> **Copy the prompts:** https://tertiarycourses.github.io/TGS-2023018659-Claude-Cowork-for-Digital-Marketing/prompts/claude/#lab-6 — click **Copy** next to each prompt, then paste it into the chat.

The story so far

Jun Wei drafted personas from instinct: 'busy young parents who love TikTok'. Rachel is not convinced. There are 150 survey answers, 60 enquiries and 200 checklists.

Your goal

Personas made up in a meeting steer content wrong. The Growth Analyst builds them from 150 survey answers, 60 enquiries and 200 checklists — and labels what is guesswork.

You'll build

three evidence-based personas and the content spec — shown as artifacts, with a Word copy of each

What is in this folder

> **.md or .pdf?** A `.md` file (Markdown) is plain text that Claude reads. Every `.md` here has a `.pdf` twin with the same name — open the PDF to read it yourself.

- `assets/survey-responses.csv`
- `assets/enquiries.csv`
- `assets/checklist-results.csv`
- `assets/persona-template.md`
- `assets/content-spec-template.md`
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 6". Run all of this lab's prompts in it.
2. **Check the data** — The CSVs and templates are already in data/. Open one and skim it.
3. **Analyse in parallel** — Copy and paste Prompt A — three analyst sub-agents, one per file.
4. **Challenge a claim** — Pick one persona statement and ask: "which rows show that?"
5. **Write the guides** — After the persona cards appear, copy and paste Prompt B: a writing guide for each persona — how to talk to them.
6. **Check the gaps** — The 60+ group must be LOW CONFIDENCE.

The prompts

PROMPT A — Claude Code: three analysts

> Use three growth-analyst subagents in parallel, one per file: data/survey-responses.csv, data/enquiries.csv, data/checklist-results.csv.
> Each uses audience-insights: counts with code, n and the file on every claim, INFERENCE and LOW CONFIDENCE labels, enquiry quotes verbatim with ids.
> Combine the results into three personas with data/persona-template.md → strategy/personas.md.
> Publish the personas as an artifact: one card each, with the key counts as small bar charts and the confidence label in colour.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: requirements

> Use the growth-strategist and the content-creator subagents to write a writing guide for each persona (data/content-spec-template.md → strategy/content-spec.md): what they most want to know, where to reach them, what to make and how long, the tone, the proof that convinces them, what we ask them to do next, and what we never say.
> Back each answer with the data: which file, and how many people.
> Publish it as an artifact: one card per persona with a one-line summary on top and the answers under plain headings, then one table comparing the three personas side by side.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Explain these personas in three sentences. Which one should we target first, and why?"
- "Which survey answers show that <a sentence from a persona>?"
- "Why is the 60+ group marked low confidence?"

Check your work

- ☐ Three analyst sub-agents ran, one per file.
- ☐ Every persona statement carries a count and a file.
- ☐ The 60+ group is LOW CONFIDENCE (n = 12).
- ☐ The most-unticked checklist item is the retirement number.
- ☐ Enquiry quotes are verbatim, with ids.
- ☐ The writing guide answers every question for every persona.

If it goes wrong

- **Numbers change between runs** — Insist on counting with code and showing the printed output.

Stretch

- Ask the analyst for a filterable dashboard of the survey as an artifact.

> **Why it matters:** Ask "which rows show that?" of anything that sounds insightful. If the agent cannot point to rows, it is an inference.

Next

Lab 7 — Growth Analyst and Strategist: Cadence and Calendar. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
