Lab 09 — The Lead Magnet: a Checklist and Its Welcome Emails

Claude Cowork for Digital Marketing · Day 2 · Use Claude Code

> **USE: CLAUDE CODE** — Code mode (the </> button) in the Claude desktop app, in your horizon-studio folder

Course: Claude Cowork for Digital Marketing (TGS-2023018659)

Day 2 · Topic 2 · about 35 minutes · slides 106–113

Surface: Claude Code (artifact, Gmail drafts, Marketing plugin, your Horizon skills)

Features: lead-magnet skill · a printable A4 checklist as an artifact · the Marketing plugin's email sequence · newsletter and sunny-voice · drafts only

> **Copy the prompts:** https://tertiarycourses.github.io/TGS-2023018659-Claude-Cowork-for-Digital-Marketing/prompts/claude/#lab-9 — click **Copy** next to each prompt, then paste it into the chat.

The story so far

Day 2. Before the campaign weeks start, Rachel wants the thing that turns readers into leads: the Money Check-up Checklist, designed to be downloaded, and the emails that follow it.

Your goal

The Money Check-up Checklist is what turns a reader into a lead. Make it worth downloading — a branded checklist — and write the welcome emails that follow the download.

You'll build

the Money Check-up Checklist as a printable A4 page (artifact and PDF) and on your copy of Horizon's website, and three welcome emails — shown as artifacts, with a Word copy of each

What is in this folder

> **.md or .pdf?** A `.md` file (Markdown) is plain text that Claude reads. Every `.md` here has a `.pdf` twin with the same name — open the PDF to read it yourself.

- `assets/checklist-items.md`
- `assets/brand.md`
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 9". Run all of this lab's prompts in it.
2. **Design it** — Copy and paste Prompt A. The checklist opens as an artifact; ask in the chat for any change.
3. **Write the welcome emails** — After the checklist looks right, copy and paste Prompt B. The three emails also appear as drafts in your Gmail.
4. **Check it** — After the three emails are saved, copy and paste Prompt C.
5. **Put it on the website** — After the checks pass, copy and paste Prompt D. Your copy of the website opens in your browser, with the checklist behind an email box.

The prompts

PROMPT A — Claude Code: the checklist

> Use the lead-magnet skill. Turn data/checklist-items.md into the "Money Check-up Checklist": a title with one promise, the ten items as tick boxes, one figure from data/facts-2026.md, the next step (book a free chat) and the full disclaimer. Lay it out as a printable A4 page in the colours and fonts in data/brand.md and publish it as an artifact. Save a PDF of it in content/lead-magnet/.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: the welcome emails

> Use the Marketing plugin's email sequence to write three welcome emails for people who download the checklist: day 0 (here it is), day 3 (the item most people miss — the retirement number), day 7 (book a free chat). Follow the newsletter and sunny-voice skills → content/email/welcome-sequence.md.
> Then, using the Gmail connector, create the three emails as DRAFTS in my Gmail, addressed to me. Send nothing.
> Publish the three emails as an artifact: one tab per email, laid out as it will look in the inbox.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT C — Claude Code: check it

> Run fact-check and fin-compliance on the checklist text and the three emails. Show the issues in one table, with a fix for each. Once I agree, make the fixes in the files and in the Gmail drafts.
> Publish the table as an artifact, coloured by severity.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT D — Claude Code: put it on the website

> Add the checked Money Check-up Checklist to Horizon's website in web/site/index.html, as a new section before the reviews, in the site's style: the title and promise, what's inside, and an email box with a required consent tick box. Once a valid email is entered, show the ten items as tick boxes and a "Print or save as PDF" button. Add "Free checklist" to the menu. Change nothing else on the site. Then start my website if it is not running, and open it.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Which checklist item do people most often miss, and why does it matter?"
- "Read the day 3 email as a 55-year-old. Is anything unclear?"
- "Explain each issue in one line: what is wrong, and the fix."

Check your work

- □ The checklist uses Horizon's colours and all ten items.
- □ It makes one promise and ends with the full disclaimer.
- □ Three emails, each with a subject under 50 characters, are drafts in your Gmail — nothing was sent.
- □ Each email has one call to action, unsubscribe and the disclaimer.
- □ fin-compliance shows no Critical or High issue.
- □ The checklist is on your copy of the website: email and consent first, then the ten tick boxes.

If it goes wrong

- **No drafts in Gmail** — Type /mcp: Gmail must be connected (Lab 4). Then say "create the Gmail drafts again".
- **The PDF is missing** — Say: "save the checklist as a PDF in content/lead-magnet/".

Stretch

- Ask for a 1080x1350 social card that promotes the checklist, published as an artifact.

> **Why it matters:** A lead magnet earns an email address. Give real value first; the call to action comes last.

Next

Lab 10 — Campaign 2: Social Media Posts (Demo). Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
