Lab 15 — Agent Teams: A Strategy Debate and a QA Loop

Claude Cowork for Digital Marketing · Day 2 · Use Claude Code

> **USE: CLAUDE CODE** — Code mode (the </> button) in the Claude desktop app, in your horizon-studio folder

Course: Claude Cowork for Digital Marketing (TGS-2023018659)

Day 2 · Topic 3 · about 25 minutes · slides 170–176

Surface: Claude Code (agent teams: Lead, teammates, shared task list, direct messages)

Features: an advocate and a critic argue the pros and cons · the Lead judges · a writer and a QA Auditor loop until PASS · FAIL goes straight back to the writer · human approval

> **Copy the prompts:** https://tertiarycourses.github.io/TGS-2023018659-Claude-Cowork-for-Digital-Marketing/prompts/claude/#lab-15 — click **Copy** next to each prompt, then paste it into the chat.

The story so far

January is for people turning 55. Before Horizon spends on a CPF explainer for them, Rachel wants it argued both ways — and the intern's draft checked until it passes.

Your goal

Subagents only report back. In a team the agents talk: two teammates argue a strategy before Horizon spends on it, and a QA Auditor sends a failed draft straight back to the writer — round after round — without the Lead in the middle.

You'll build

the decision (pros, cons, verdict), then an email, a video script and a thumbnail that passed QA, submitted for your approval — shown as artifacts, with a Word copy of each

What is in this folder

> **.md or .pdf?** A `.md` file (Markdown) is plain text that Claude reads. Every `.md` here has a `.pdf` twin with the same name — open the PDF to read it yourself.

- `assets/turning-55-brief.md`
- `assets/turning-55-draft.md`
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 15". Run all of this lab's prompts in it.
2. **Part 1: the debate** — Copy and paste Prompt A. The advocate and the critic message each other; the decision page shows their debate.
3. **Decide** — Read the decision artifact. Reply "go", "go with conditions" or "no-go" — the call is yours.
4. **Part 2: the QA loop** — After you have made the call, copy and paste Prompt B. The audit fails on round 1; watch the auditor message the writer directly.
5. **Approve as a person** — Read the pieces and the QA artifact, then type in the chat: approved <id> by <your name> (or: changes <id>: what to fix).
6. **Shut down** — After you have approved the pieces, copy and paste Prompt C. The Lead stops each teammate and cleans up the team.

The prompts

PROMPT A — Claude Code: the strategy debate

> Create an agent team to test the strategy in data/turning-55-brief.md before we spend on it.
> You are the Lead and the judge: do not argue.
> Spawn two teammates:
> - advocate, using the agent type growth-strategist: argue FOR the strategy.
> - critic, using the agent type growth-analyst: argue AGAINST it.
> - Both: cite data/campaign-results.csv, strategy/personas.md, data/facts-2026.md or data/compliance-checklist.md for every point; message each other directly; rebut twice at most.
> - You: write strategy/turning-55-decision.md with the pros, the cons, your verdict (go / go with conditions / no-go) and the conditions.
> Publish the decision as an artifact with the verdict on top, the pros and cons in two columns, the debate (the messages the advocate and critic sent each other, in order) and what I do next. Then wait for my decision.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: the QA loop

> Clean up the debate team, then create a new agent team for Part 2 of data/turning-55-brief.md, using my decision. Spawn three teammates:
> - writer, agent type content-creator: rewrite data/turning-55-draft.md into content/turning-55/email.md and content/turning-55/video-script.md.
> - qa-auditor: audit each piece with fact-check and fin-compliance; write review/turning-55-qa.md, one section per round, PASS or FAIL per check. On FAIL, message the writer directly with the lines to fix and audit again. Three rounds at most.
> - designer, agent type creative-designer: once a piece passes, ask the writer for its headline and make one thumbnail with alt text.
> - You, the Lead: never write or fix content. When everything passes, submit each piece with scripts/submit.mjs. Publish nothing.
> Publish the QA report as an artifact, one row per round, PASS or FAIL per check, in colour.
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT C — Claude Code: shut down

> Ask every teammate to shut down, then clean up the team. Show me the final task list and how many QA rounds each piece needed. Publish it as an artifact.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Summarise the debate: the best point for, the best point against, and your verdict."
- "What failed in the first QA round, in plain English?"
- "How many rounds did each piece need, and why?"

Check your work

- ☐ The advocate and the critic messaged each other; every point cites a file.
- ☐ The decision has pros, cons, a verdict — and you made the call.
- ☐ Round 1 of the QA report FAILED: the FRS figure, CPF LIFE "from 55", the promised payout, the advice and the missing disclaimer.
- ☐ The auditor sent the fixes to the writer directly; a later round PASSED.

- □ You approved by typing in the chat; the rows show your name and a hash.
- □ Both teams were shut down and cleaned up.

If it goes wrong

- **You got subagents, not a team** — Ask for "an agent team" by name in a new session.
- **The loop never ends** — Remind the Lead: three rounds at most, then escalate to me.
- **A task stays blocked** — Tell the Lead to check the task list and nudge the teammate who owns it.

Stretch

- Add a third debater, a pre-retiree persona, who argues from the customer's side.
- Run Part 2 with subagents instead and compare: how many times did the Lead have to relay a fix?

> **Why it matters:** Use subagents when only the result matters; use a team when the agents must talk — to argue, or to send work back. Every teammate is its own Claude session, so teams cost more tokens.

Next

The course summary, then the assessment.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
